

Coquitlam Optical Network Corporation

2009 PRICE SHEET

Description	Price
Optical fibre lease to QNet co-location facility from consumer premises*	\$400 per strand per month (includes both last yard and arterial segments)
Optical fibre lease under 5km (point-to-point)	\$300 per strand per month
Optical fibre lease over 5km (point-to-point)	\$600 per strand per month
Building entrance (last yard) only	\$100 per month per strand
One time connection fee (per physical address or end point) – non refundable	\$800
Public sector pricing	50% of standard pricing
Annual inflation rate for future year pricing (not applicable for pre-paid leases)	2.5%

\* All connections to QNet co-location facilities are priced as “under 5km” leases

For no additional charge, optical fibre leases include:

- Installation of the last yard fibre connection to consumer premises if the connection is not pre-existing (i.e. QNet has 90 days to install the last yard connection once a service order has been executed)
- 24 X 7 access to QNet co-location facilities where the QNet fibre segments are terminated on optical distribution frames (QNet provides two carrier grade, data centre environments for telecom equipment co-location and access to transit provider networks)
- Up to one full equipment rack in a QNet co-location facility for every 48 strands of leased fibre
- Up to 2kVA power consumption per equipment rack
- Fibre patch cords for connecting active equipment
- Pro-active ODTR monitoring of active fibre strands
- Flexible lease terms of three to twenty-five years
- No inflation adjustment on pre-paid leases
- Infrastructure is fully supported 24 X 7 year round with published service level targets and operating procedures
- Free logo placement and link from [www.qnetbc.net](http://www.qnetbc.net) website
